

Dear FCC:

We have had peace and quiet since the Do Not Call program was put into place here in NJ and Federally as well. NJ's law is tougher than the Federal law but not onerously so. The extra layer of protection for our peace and quiet protects the consumer who needs to be protected from this vile form of unwanted and unsolicited business. I do not want companies that claim to know me due to some nebulous "business relationship" within 18 months to call me. If I want them, I will call them. Please do not give telemarketers this opening. Preserve state rule in this important area and let the telemarketers fade away.

Sincerely,

George Grabowich
